SUMMARY

Passionate MERN Stack Developer experienced in building scalable, responsive web applications using React, Node.js, Express, and MongoDB, with modern tools like GraphQL and WebSockets. Focused on clean architecture, performance, and user experience. Currently pursuing a Computer Systems degree at NED University with a strong foundation in networking principles.

SKILLS

- **Frontend**: React, JavaScript, Tailwind CSS, Bootstrap, GSAP, Zustand, Figma
- **Backend**:Node.js, Express.js, Socket.IO, REST APIs, GraphQL
- **Databases**:MongoDB, SQL
- **Languages**:JavaScript, Python, Java, C
- **Tools**: Git, GitHub
- **CS Fundamentals**: OOP, DSA

EDUCATION

Bachelor of Engineering in Computer And Information Systems   **2023-2027**

NED University of Engineering And Technology

O/A Levels   **2019-2023**

The City School

EXPERIENCE

ACE SYSTEMS (ISP Support Assistant (Part-time))   **April 2025 - August 2025**

- Supported the technical team with device installation, wiring, and minor electrical tasks as needed.
- Perform basic router configuration and manage OLT (Optical Line Terminal) and ONU (Optical Network Unit) settings
- Applied strong networking fundamentals—including routing, switching, IP addressing, and troubleshooting—developed through hands-on practice with Cisco Packet Tracer.
- Designed and developed a MERN stack admin portal to manage including expense tracking, records management, and basic reporting.

CERTIFICATIONS & ACHIEVEMENTS

- **Intermediate Python** from Data Camp
- **JavaScript for Beginners - The Complete introduction to JS** from Udemy
- **3rd Position** in Qubit coding competition .

SOME PROJECTS

LexiMind AI:

- AI-driven platform designed to help users systematically improve English vocabulary.
- Features secure authentication, word review system, and adaptive AI-evaluated quizzes.
- Powered by Google Gemini for intelligent answer evaluation and contextual feedback.
- Admins can curate vocabulary with meanings and example sentences

My Portfolio:

- Built with React, Tailwind CSS, Zustand, and GSAP ScrollTrigger.
- Integrated EmailJS for direct contact form.
- Custom cursor + Particle.js for creative interactivity.

CodeArena:

- Built with MERN stack, GraphQL for efficient data handling, and WebSockets for real-time gameplay.
- Players compete in 10-minute matches, solve difficulty-mapped problems, and earn points.
- Live leaderboards, detailed scoreboards, and match history tracking.
- Real-time head-to-head coding battle platform with rank-based matchmaking.
