SUMMARY

Full-Stack Developer experienced in building production-oriented web applications, SaaS platforms, AI-powered systems, and real-time applications. Skilled in React, Next.js, TypeScript, Node.js, PostgreSQL, MongoDB, GraphQL, Socket.io, and AI APIs. Experienced in developing end-to-end features, integrating third-party APIs, authentication, real-time communication, and responsive interfaces. Currently pursuing a Bachelor of Engineering in Computer and Information Systems at NED University.

SKILLS

- **Frontend:** React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Bootstrap, Zustand, Framer Motion
- **Backend:** Node.js, Express.js, REST APIs, GraphQL, Socket.io, WebSockets
- **Databases:** PostgreSQL, Supabase, MongoDB, SQL
- **Languages:** JavaScript, TypeScript, Python, Java, C
- **Tools:** Git, GitHub, VS Code, Vercel, Figma
- **AI / APIs:** Gemini API, RAG, pgvector, Web Speech API

EDUCATION

Bachelor of Engineering in Computer And Information Systems	2023-2027
NED University of Engineering And Technology	
O/A Levels	2019-2023
The City School	

EXPERIENCE

ACE SYSTEMS (Part-time)	April 2025 - Present
• Perform basic router configuration and manage OLT (Optical Line Terminal) and ONU (Optical Network Unit) settings • Applied strong networking fundamentals—including routing, switching, IP addressing, and troubleshooting—developed through hands-on practice with Cisco Packet Tracer. • Designed and built the company website to showcase services, packages, and customer information.	
Al-Hamd Granite & Marble	
• Developed a responsive marble & granite business website with product and service sections. • Built an interactive marble/granite visualizer for previewing different stone designs. • Integrated product details, custom work showcases, and WhatsApp customer inquiries.	

CERTIFICATIONS & ACHIEVEMENTS

- **Intermediate Python** from Data Camp
- **JavaScript for Beginners - The Complete introduction to JS** from Udemy
- **3rd Position** in Qubit coding competition .

SOME PROJECTS

DocMind AI — AI Document Chat Platform:

- Built a SaaS platform allowing users to upload documents and interact with them through an AI-powered conversational interface
- Implemented Retrieval-Augmented Generation (RAG) to ground AI responses in uploaded document content
- Designed authentication, database, and vector search architecture using Supabase, PostgreSQL, and pgvector
- Built a responsive full-stack interface using Next.js and TypeScript

AI Negotiation Simulator

- Simulating realistic negotiation scenarios against distinct AI opponent personas
- Integrating Gemini API to generate dynamic, context-aware negotiation responses
- Implementing Supabase authentication and Row Level Security (RLS) for user-specific data access
- Integrating browser-based speech capabilities using the Web Speech API for voice-based negotiation practice

CodeArena:

- Built a real-time multiplayer coding competition platform where players compete by solving programming challenges
- Implemented Socket.io/WebSockets for real-time game state, player interactions, and competition updates
- Integrated Monaco Editor for an in-browser coding environment
- Developed backend APIs and real-time communication using Node.js, Express, GraphQL, and MongoDB
